

BILFINGER SALAMIS UK

NORM DECONTAMINATION UNIT

SPECIALIST SERVICES

Bilfinger Salamis UK's NORM decontamination unit can be mobilised for onshore and offshore cleaning operations, or placed permanently on location for ad-hoc use.

NORM scale removal and cleaning offshore using the decontamination unit can be one third of the cost of shipping back onshore for disposal. The training of core crew can be undertaken so they can carry out these duties, thus facilitating quick start operations, without the need to wait for equipment or operators.

Technical data:

Strip lights in dirty areas
Galvanised folding doors with windows to separate clean and dirty areas
